REID SECURES \$2.5 MILLION FOR FIREFIGHTER TRAINING

Washington, D.C. – Working to protect Nevada communities and prepare Nevada's firefighters, Senator Harry Reid has secured \$2.5 million for the Fire Science Academy at the University of Nevada, Reno.

Reid is a senior member of the Senate Appropriations Committee and plays a key role in obtaining federal funds for Nevada.

"Our firefighters and emergency responders put their lives on the line to protect our communities," said Reid. "We owe it to them to make sure they have the training and equipment they need."

The Fire Science Academy in Elko, NV has been training first responders for 32 years. FSA instructors teach students how to handle life-threatening situations such as responding to hazardous materials, firefighter training, and rescue training.

"Thanks to Senator Reid, we will be able to prepare 800 emergency workers to respond in industrial accidents," said Denise Baclawski, FSA executive director.

The Fire Science Academy expects 2,500 emergency responders to enroll this year. The \$2.5 million in federal funding will be used to provide scholarships and for other purposes, Baclawski said.
